

ELECTRONICS TECHNICIAN FOR MANAGEMENT ENGINEERING

Electronics technicians for management engineering ensure the professional installation, maintenance and inspection of electrical devices. At this, they develop, construct, inspect and repair electrical, electromechanical and electronic assembly units and appliances. Measuring currents, voltages and other physical variables plays a major role. In their work, electronics technicians are supported by IT systems. So they learn how to program and configure control systems by means of the computer. An electronics technician must regularly come to an agreement with upstream and downstream domains to fulfill his

tasks, as well as stick to instructions and safety regulations.

Education

Duration: 3.5 years

Dual system: attendance at vocational school twice a week

Major tasks

Installations, reparations of machines and devices, inspections and measuring of electrical devices and components, assembly of switching devices and switchboards

Prerequisites

- 🔵 School-leaving qualifications: Secondary General School class 10b
 - 🔵 Good grades in mathematics and physics
 - 🔵 Affiliation to systematic methodic procedures
 - 🔵 Interest in mechanic technical processes
 - 🔵 Interest in technics and data processing
 - 🔵 Ability to work as part of a team
-
