

IT SPECIALIST FOR SYSTEMS INTEGRATION

Modern computer technology is self-evident for our modern enterprise. IT specialists analyse different requirements and connect necessary hardware and software components in networks in order to ensure optimal use of our computer technology. By integrating hardware and software components to complex systems, custom-made IT solutions can be realized. Another essential area of tasks is advice, supervision and training of PC users.

Typical fields of application in the branch of systems integration are e. g. user service, supervision of networks

and client-server systems or computer centres.

Apprenticeship

Duration: 3 years
